

stacking cups

ways for every age to play

Ways Babies can play Stacking cups with Grandma, Grandpa or anyone else:

- Teething. Babies love to test textures with their mouths. They differentiate between sizes and shapes all while gripping and chewing.
- Roll the cups. Watch what happens when you roll the cups to or away from your child. They are learning hand and eye coordination as they reach for a moving cup.
- Hide small items under the stacked cup. Babies love the surprise of finding more cups under the big one, or even a smaller toy.
